

PatOrg IP Portal

The PatOrg IP Portal provides simple and easy access via Internet to data administered by the PatOrg IP Management system. Cases, due dates, invoices and also documents now become visible through an Internet Browser – from anywhere and on any software platform, no matter whether you use Windows, Linux or Macintosh.

Thus, a number of new possibilities open up for law firms as well as for patent departments. Clients can be allowed to look at data of your law firm. For IP departments the IP Portal is particularly suitable to provide patent information across a corporate group.

Intuitive handling

The IP Portal is easy and intuitive to use. No knowledge of PatOrg is required to use it. Instead of the IDs used in PatOrg IP Management, only plain text is displayed for the associated users, for example 'Applicant' instead of the abbreviation 'AN'.

Widely configurable

The release of data can be configured flexibly and individually on the basis of user and authorisation profiles. This allows you to define exactly which people should have access to which data and documents. The menu, filters and listings can be customised extensively and specifically for users and clients. For example, the IP portal makes it possible to provide menu entries that display new documents with one click or the IP rights that could potentially be renewed in the near future.

The PatOrg IP Portal also offers the same filtering options as the PatOrg IP management software, in particular the creation of specific search filters.

Document view

The IP Portal has an integrated function for viewing documents. It can be switched on in the listing if required, so that you can easily view large quantities of documents.

Commenting

Files, due dates and other data records can be commented on.

Branding

The IP Portal offers various ways to adapt the layout to the visual appearance of your organization. Among other things, the user can select any colour scheme and insert self-made headers and footers for that purpose. This way the IP Portal integrates itself also in terms of its configuration into any website.

Dashboard

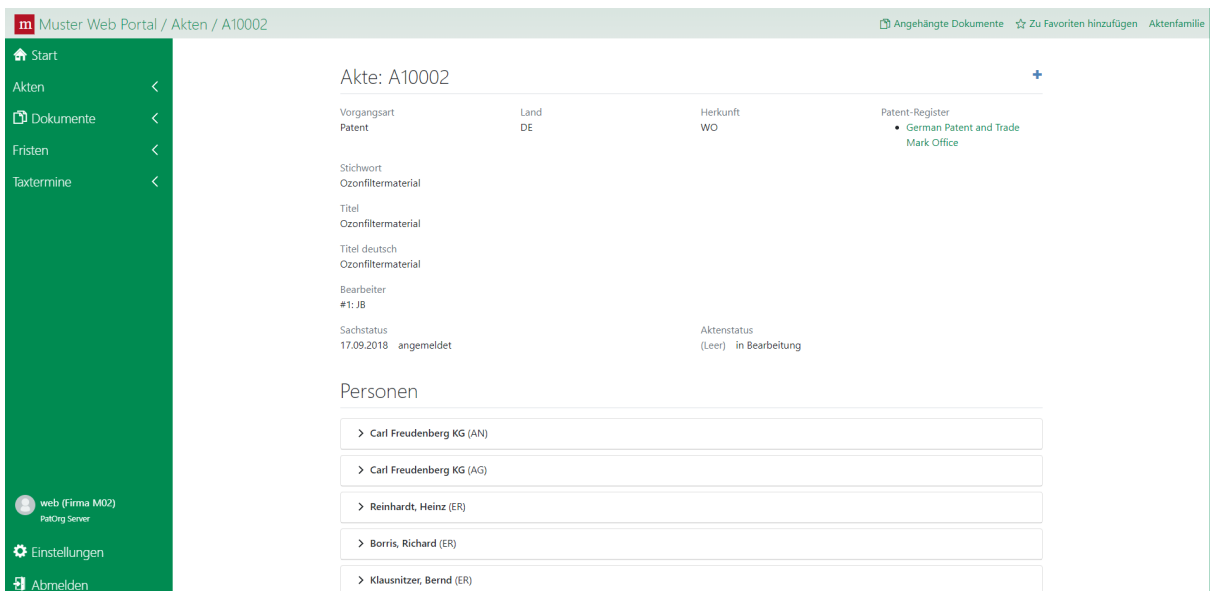

A home screen can be configured that provides an overview of certain data, such as a diagram that shows how the managed IP rights are distributed by transaction type, country or status.

2FA

Optionally, access to the portal can be secured using 2-factor authentication.

Integration of statistics services

Optionally, third-party services can be integrated to generate access statistics, such as Google Analytics. This enables law firms to precisely analyse which clients use the IP portal, how often and which information is primarily accessed.

The screenshot displays the 'Muster Web Portal' interface. The top navigation bar includes 'Angehängte Dokumente', 'Zu Favoriten hinzufügen', and 'Aktenfamilie'. The left sidebar contains a green menu with 'Start', 'Akten', 'Dokumente', 'Fristen', 'Taxetermine', 'web (Firma MD2) PatOrg Server', 'Einstellungen', and 'Abmelden'. The main content area shows 'Akte: A10002' with a table of details:

Vorgangsart	Land	Herkunft	Patent-Register
Patent	DE	WO	German Patent and Trade Mark Office

Below the table, the following information is displayed:

- Stichwort: Ozonfiltermaterial
- Titel: Ozonfiltermaterial
- Titel deutsch: Ozonfiltermaterial
- Bearbeiter: #1: JB
- Sachstatus: 17.09.2018 angemeldet
- Aktenstatus: (Leer) in Bearbeitung

The 'Personen' section lists the following individuals:

- > Carl Freudenberg KG (AN)
- > Carl Freudenberg KG (AG)
- > Reinhardt, Heinz (ER)
- > Borris, Richard (ER)
- > Klausnitzer, Bernd (ER)
